CASE STUDIES

In Limpopo (Mopani District and Vhembe District) we were employed by the Kumaka Development to supply water to households in the area, as part of their social and community assistance project. The project is managed and overseen by Randwater National. The severe drought and drying up of supply dams has resulted in a water crisis, leaving hundreds of households without drinking water.

LIMPOPO TZANEEN COMMUNITY

- The local communities were overjoyed to have access to water in the long period of drought.
- The project provided us with a heartwarming opportunity to contribute to a community that was suffering from a shortage.

SUPPLYING DRINKING WATER TO LOCALS

One of the most rewarding activities we are involved in is supplying drinking water to communities that have for some reason been cut off from basic services

LOCALS WITH BOTTLES WAITING FOR WATER.

When we are supplying drinking water over a protracted period, the work also involves sourcing and fetching this water on regular trips.
